PROFILE

I am a full stack web developer with a strong interest in projects that require both conceptual and analytical thinking. I love to solve problems with code while applying industry best practices in a collaborative environment. Fully-committed to designing and developing innovative web-based materials that users will love. Focused and self-motivated professional, with 7 years experience in Information Technology. Always eager to learn more tricks from anyone - regardless of the industry they're working in.

INFOSYS LIMITED
July 2008 - Sep 2015

Infosys Limited is an Indian multinational corporation that provides business consulting, information technology and outsourcing services.

Software Engineer/Technology Lead

Worked on multiple projects across domains and technologies. My commitment and dedication helped me move up to a Lead position really quickly.

- Worked on the ETL Framework migration for a prestigious AUS Bank
- Interactions with the business analysts for analysis and design, understanding the technical requirements to be applied during development
- Provide technical mentoring, perform reviews and contribute to functional and technical documents
- Planning and tracking 24*7 production support cycle, analyse and suggest/implement work-around and perform Root Cause Analysis and fixes to avoid re-occurence
- Handling Configuration Management and Control
- Creation of source code for conversion/collection programs

HIGHLIGHT
